MASAOMI KANZAKI

Introduction

In the eighties, everybody was talking about machines, the future of mankind and the potential dangers that the production of robots and cyborgs would cause. Science Fiction novels, films and comics were full of computers and robots which rebelled against humans or aspired to control the world. For a long time this was the driving idea that human nightmares came from.

Such scenarios are almost forgotten today, and less attention is paid to machines with the coming of a new field that is difficult to control: DNA manipulation. Whether it's focused on vegetables or humans doesn't matter, the possibilities of genetic engineering are the main research interest worldwide. An understanding of the mechanisms of genetics and the fundamental laws on which they are based of will perhaps someday allow us to cure all diseases and to create new species which will be superior to the old "nature" ones. Thanks to the media we are well informed about the dangers and the common point of view is that gene dangers result from the manipulation of DNA.

Kanzaki is an author who has attentively followed the scientific developments in this field and especially the special problems linked to the latest discoveries. This is why his new manga isn't about cyborgs anymore (as Xenon was) but about genetically engineered humans. In Hagané, an unscrupulous organization called "Red Sea" attempts to combine the genes of famous dead people with those of normal, living people. They want to create a superhuman with characteristics and abilities that can be chosen at will. Imagine what an Einstein living today could do with all the newest discoveries, or how a Pasteur would use a modern laboratory. But what if a new Jack the Ripper roamed the streets at night? One of the many people who were chosen by the "Red Sea" for their DNA-modification experiments is the schoolgirl Hagané Yekushimaru, whose life now becomes a nightmare.

Hagane Yakushimaru

The main character of our story is the 17-year-old schoolgirl Hagane. She is very strong - something already suggested by her name (Hagane means "Steel"). She enjoys motorbikes and spends many a night with an exciting race. Since her childhood she has required medical attention for reasons unknown to her. Bad luck that she's about to find out why now.

The Doctor

Hagane's doctor appears to be a quiet and friendly person, but appearances are deceptive. He has great expectations of Hagane, and is ready to do anything to achieve his goals. Perhaps he's involved in some dirty DNA affairs...

Ren Mizuki

Also a mysterious figure. Is he Hagane's enemy or her last hope? She must decide for herself. If she can trust him and his words. At any rate he acts like a friend, and a very well informed one at that!

Jack the Ripper

The name "Jack the Ripper" refers to a serial killer who murdered many prostitutes in London's East End in 1888. His name comes from a confession letter which was published at the time. But what does this man have to do with the current series of murders in Tokyo? Maybe he is still alive.

Anyway, Billy is said to have killed 21 people ("Mexicans and Indians not included") before his death at 21; he was a cruel man.

Finally, Billy and his 16 comrades entrenched themselves in the house of an exception, *McBreen*. The house was besieged by 40 soldiers and it led to a 5-day long continuous battle.

For expense in terms of
armament, the attackers
forced Billy to capitulation
by setting the house on fire -
yet Billy made the impossible
possible and fled with his men.
From this infamed
